Security Operations

Secure Software Development

Dec 12, 2024

Shabnaz Khanam

has successfully completed the online, non-credit Specialization

CISSP Certified Information Systems Security Professional

Congratulations on successfully completing the CISSP Certification Preparation course! Throughout this course, you've gained expertise in key domains such as Security and Risk Management, Asset Security, and Identity and Access Management. You've mastered the fundamentals of security governance, legal compliance, and business continuity, as well as critical frameworks like ISO and NIST. The course provided in-depth knowledge of data protection, secure communications, cryptography, and secure software development. With practical insights into real-world cybersecurity scenarios, you are now equipped to excel in your career and confidently apply your skills in both governance and technical implementation.
